Malignant Lymphoma, Large Cell, Cleaved

National Cancer Institute

Source

National Cancer Institute. *Malignant Lymphoma, Large Cell, Cleaved*. NCI Thesaurus. Code C27265.

Antiquated term describing non-Hodgkin lymphomas that are usually diffuse and are composed of large cells with irregular nuclei, invisible nucleoli and a small amount of cytoplasm. This morphologic category includes both mature B- and mature T-cell lymphomas.--2004
