Yttrium Y 90 Monoclonal Antibody BrE-3

National Cancer Institute

Source

National Cancer Institute. *Yttrium Y 90 Monoclonal Antibody BrE-3*. NCI Thesaurus. Code C2607.

A radioimmunotherapeutic agent consisting of a monoclonal antibody (BrE-3) directed against the tumor-associated antigen epithelial glycoprotein mucin chelated to the radioisotope yttrium-90. Yttrium Y 90 monoclonal antibody BrE-3 binds to tumor cells expressing epithelial glycoprotein mucin, selectively delivering a cytotoxic dose of beta radiation. (NCI04)
