Potential competing interests: No potential competing interests to declare.

The research topic is of great interest. I congratulate the authors for their work in this field. It is recommended that the content be more organised. There are repetitive expressions.

The reliability of the survey questions used in the research is not clearly stated. this may affect the accuracy of the research results.

Findings should be given in line with the hypotheses of the research.

It is thought that qualitative evaluation will increase the quality of the study.
