Potential competing interests: No potential competing interests to declare.

Introduction

The use of wouldn't and shouldn't in the second paragraph in lines 3 and 4 is inappropriate.

The third paragraph "It seems" removes and starts with Moscow.

The whole of the introduction has no single citation, making it a narrative article rather than a research article.

No motivational problem statement, significance of the study, or justification for selecting four groups of companies to study.

Methodology

The discussion of the findings is okay.

However, the source of data is not specified.

The method of analysis is not justified.
