Thank you for asking my opinion about the manuscript entitled "Application of Data Mining Combined with K-means Clustering Algorithm in Enterprises' Risk Audit".

I believe that this manuscript should be major revision:

Q1. It is very important to change and modify the title. The title is not appropriate.

Q2. Are the objectives and the rationale of the study clearly stated?

Q3. In the abstract, the research gap was not clearly stated. In addition, the authors need to rewrite the study objectives to be more academic writing.

Q4. In the introduction, include the study's significance and novelty. What makes the study different from the rest and what it adds to the current knowledge?.

Q5. In the introduction, the authors should have explained the purpose of this study and the existing gaps in this field and explained why this study was conducted.

Q6. Are the methods clear and replicable? Do all the results presented match the methods described?

Q7. If relevant, are the results novel? Does the study provide an advance in the field? Is the data plausible?

Q8. References are relevant, correct, and not recent. The number of references should be increased. Please add some references. Since this is a scientific review, all the sentences need to be supported with references.

This study is very beautiful. I liked the sequence and enjoyed reading. Please add more references on similar studies.

Q9. There are a lot of grammatical errors. This must be taken care of and addressed.

Q10. What are the limitations of the study? A description of limitations is missing at the end of the discussion section.
