Hearty Congratulations to the author for the efforts. It is evident that the author has put sincere efforts to find the best suitable outreach model for MFIs in Ethiopia. The data for the period 2007-20 is good enough to support the proposed model and findings. The only suggestions are to trim down the content, especially in the literature review section and at the places where the variables are described or various test results are discussed. Some of the information can be presented in the form of Tables and Graphs.

All the best.
