

Review of: "Water-Energy Nexus in Power Systems: A Review"

Richa Soni

Potential competing interests: No potential competing interests to declare.

This article is well-written and gives readers a plethora of information. A lot of recent references have been used. The use of figures and graphs could have gained reader's attention. Authors can highlight the problem/opportunity spaces for water in energy and for energy in water. Some emphasis on challenges faced could have added to the impact of the article. Overall, it is a great effort, and the article provides a lot of useful information.
