This is a well written discussion paper. The paper addresses an important topic in biomedical research, in particular, ethics of biomedical research and the ethical principle of socially responsible research. The author has provided an elaborative, thoughtful, and evidence-supported discussion of the ethical principle of socially responsible research, the disciplinary moral identity and how it may affect researchers' views of socially responsible research, and the importance of interdisciplinary research teams and community engagement in assuring that biomedical research is a socially responsible as possible.
