Potential competing interests: No potential competing interests to declare.

This idea and concept of The Role of Financial Literacy on Sustainable Development of Micro, Small and Medium Enterprises (MSMEs) in Africa seems as far as I know, are being introduced into the literature for the first time. This is something that should be studied by all researchers further. The story and backstory are very well done and show depth so that readers can draw their own conclusions. There is so good empirical analysis to actually illustrate this. This document does an excellent job of creating a context for the idea of a document.

The references should be updated with the most recent in your paper's research field of relevance. I recommend the authors to consult the following survey and empirical papers to contextualize your findings. This should help the readers to understand the novelty of your work:
