

Review of: "Determination of Evapotranspiration and Crop Coefficients of Irrigated Legumes on Different Soil Types Using the FAO56 Approach"

Simon Alina

Potential competing interests: No potential competing interests to declare.

I appreciate the work put into making this article. It is valuable work.

I would have some suggestions:

Language can be improved: Check of grammatical errors.

Check the reference.

Some of the text from material and methods is part of the introduction chapter.

Good luck!

Sincerely,

Alina Simon
