# Infantile-Onset Multisystem Autoimmune Disease 1

National Cancer Institute

## Source

National Cancer Institute. *Infantile-Onset Multisystem Autoimmune Disease 1*. NCI Thesaurus. Code C157123.

An autosomal dominant condition caused by mutation(s) in the STAT3 gene, encoding signal transducer and activator of transcription 3. It is characterized by variable features along a spectrum of autoimmune disorders affecting multiple organs. Common manifestations may include insulin-dependent diabetes mellitus and autoimmune enteropathy, or celiac disease, and autoimmune hematologic disorders. Other features include short stature and nonspecific dermatitis.
