Dear editor,

Good day.

After carefully reviewing the article "Analytical Study and Amelioration of Plastic Pavement Material Quality," the article cannot be accepted in its current edition. The language of writing is so bad and weak. The structure of the article, as well as the content, needs to be reorganized and reconsidered. It should be expressed by a fluent writer. My initial comments are in the attached uploaded copy of the manuscript in the Supplementary Data section.

My assessment of the draft:

- Originality/Novelty: 8.5/10
- Language: 5/10
- Grammar: 5/10
- Structure: 7/10
- Clarity: 8/10
- Length: 8/10

So, the article cannot be accepted in its current edition.

Eslam Syala
