**Potential competing interests:** The author(s) declared that no potential competing interests exist.

There are some spelling and sentence making issue

In section 3.4 : Evaluation of RSM "Design"

where the Design should be Design

In section 5 Pdc is written in place of PDC

Tables and figures should be properly drawn

In the paper why PBM method is used is not explained.

The ANOVA results, the way it is cited in section 3.5 can be dealt with the reference of table number

I could not find the equation number in the text.

The paper with proper formatting and revision can be accepted
