Review of: "Multifaceted Management of Severe Pancytopenia in a Diabetic Patient: A Case of MRSE-Induced Bone Marrow Suppression"

Dr. Anjum Khanam¹

1. Jazan University, Saudi Arabia

" Multifaceted Management of Severe Pancytopenia in a Diabetic Patient: A Case of MRSE-Induced Bone Marrow Suppression" is an interesting case and well documented. Below are a few comments:

1. Ensure uniformity in citation and formatting.
2. Was the HbA1c value recorded?
3. The relationship between the diabetes and the immunosuppression should be discussed and elaborated.
