Review of: "Self-Rated Periodontal Health and Its Association With Pre-Eclampsia Among Pregnant Patients in Lagos State"

Mohammadbagher Sohrabi¹

1. Shahroud University of Medical Sciences, Shahrud, Iran

Thank you to the esteemed authors. The work is relatively good and appropriate, and given the prevalence of periodontal diseases, it covers many people in society, especially pregnant women. However, it needs a brief edit, including:

- Please first mention the factors involved in periodontal disease and then state the hypothesis of its possible effect on preeclampsia.
- In the results section, please write a clearer explanation of the findings, especially the significant relationships.
- In the discussion section, please compare the results with the studies of others.
