Hello dear Joshua,

I hope you are doing well. Thank you for your nice paper.

My recommendations are as follows:

1. The sentence "predictive models for unemployment rates in developing countries during the implementation of Industry 4.0" is repeated many times.
2. When you present/state some facts, it is better to support them using references.
3. Finally, I think your paper is written by AI based app like chatgpt because some words have been repeated many times.

Best regards

Milad Farahani
