Potential competing interests: No potential competing interests to declare.

First of all, I would like to congratulate the authors on a very nicely written and well-structured paper. In many years of reviewing, and after reviewing over 100 research papers, I think this is the first I have seen without a single mistake in the English usage and the first for which I have no requests for changes.

The only thing that I would suggest is to maybe add half a sentence to explain what is meant by paraveterinarians the first time the term is used, but this is not really necessary, as the meaning becomes clear as one reads the paper.
