

Peer Review

Review of: "Evaluation of Indonesia's Scientific Publication Performance: Quantity, Quality, Open Access, and Comparison with ASEAN Countries"

Manthan Janodia¹

1. Independent researcher

The authors have deliberated on the scientific output of Indonesia and compared it with select ASEAN countries. The following are observations that the authors may address to make the research more meaningful.

1. Did the authors exclude self-citations in their assessment?
2. In Fig. 1, the authors have compared the OA ratio with the number of countries. Can the authors provide the split of the OA ratio for each country?
3. In Table 1, the number of average citations seems unrealistic. Can the authors confirm whether the average citations mentioned are correct and provide the link to the source of this information?
