

Review of: "Enhancing Business Model Resilience in the Machine Tools Industry: A Case Study of ABC Company"

Madhab Chandra Jena

Potential competing interests: No potential competing interests to declare.

1-Spelling and grammars to be checked thoroughly

2- when you are mentioning about a case study, the unit/case details to be more specific

3- It looks more theoretical, gap analysis with proper tool or statistical method is missing

4- whole paper completed without any proper kind of quantitative figures, which should not be in a case study
