- [http://The author studied "A memory dependent analysis on permeation of non-Gaussian laser pulse through human skin" and proposed a theoretical model. The paper is well organized, and some of the results are valuable. However, as a research paper, there are some issues that need further exploration. 1. Whether the theoretical model proposed by the author is applicable to the research results of other authors. 2. There are many grammar or linguistic issues in writing that require further revision.](#)
