Potential competing interests: The author(s) declared that no potential competing interests exist.

The topic of the manuscript is not novel. However, the number of case reports on Pott's puffy tumor is limited and therefore another one is probably worth publishing.

The manuscript requires editing by a native speaker.

The figures would be clearer if only several scans were selected and enlarged instead of the whole series.

How long did the patient treated with antibiotics (intravenous or oral)? What antibiotics?

How was the frontal sinus ostium patency ensured?
