**Potential competing interests:** No potential competing interests to declare.

This is a simple yet well written paper on Coronavirus Disease 19, depicting the students side of the disease.

The abstract and main manuscript looks to be in line with the Journal's guidelines. The article is fairly fresh. Conclusion part should be rephrased avoiding numbers and focusing on writing bullet points.

References are well given.

On a whole the article is publishable post proof reading and minor adjustments. English grammar would be looked upon by the Journal itself.

Thank you very much
