Review of: "Medical Education Gone Viral During the COVID-19 Pandemic"

P Ravi Shankar¹

1. International Medical University, Malaysia

Thank you for sharing. This is an interesting study, but as of 2025, there have been several studies on this topic. A more structured framework for describing the results would be useful. Frameworks like the Consolidated Criteria for Reporting Qualitative Research (COREQ) may be helpful. The lack of ethical committee approval may be a challenge. What support was provided to residents who required it based on the psychiatric interviews?

This is a preliminary study. Many of the factors mentioned could be explored in greater detail. Have the authors conducted a more detailed study?
