Potential competing interests: No potential competing interests to declare.

The following changes may be considered by the authors:

1. Research objective needs to be re-written as the article not only identifies the factors but also evaluates them
2. In the review of literature section, the definitions of MSMEs can be tabulated to enhance readability.
3. Hypothesis H1 is grammatically incorrect.
4. In section 2.4, academic writing style is not followed. Words like "you" are not encouraged in academic writing.
5. The Discussion section needs to be elaborated by making an attempt to generate managerial implications for Micro, Small and Medium enterprises separately.
6. The Conclusion section of the paper is too generic.
7. Overall, the paper fails to highlight the novel outcomes from the analysis. Rigour is required to make it publishable.
