Potential competing interests: No potential competing interests to declare.

abstract: The abstract has a misspell (PRISMA). Please add info about previous similar studies on the topic. Add the results and conclusions in your abstract.

manuscript: the whole full text is poorly written in scientific English, please have it completely reviewed by a professional editor.

Introduction: what are the similar articles (review, meta-analyses) already published on this topic?

Methods: what was the outcome of the study? only complete evacuation of the uterus? other outcomes are interesting such as infection, need for subsequent operation, hemorrhage, other complications? it could be useful to perform a subanalysis according to the gestational age at miscarriage, within the first trimester.
