

Review of: "Sustainable entrepreneurial ecosystems in developing economies: A conceptualisation of complex adaptive systems approach"

Tao Shen

Potential competing interests: No potential competing interests to declare.

The article is highly readable and novel. Looking forward to further results, I believe that this conceptual model will make a great contribution to SEEs in developing countries. However, there are many developing countries in the world today, and the economic development of each country varies greatly. Further research is needed to determine whether this model is suitable for each developing country. To achieve this, appropriate research design is also necessary.
