13-Hydroxyoctadecadienoic Acid

National Cancer Institute

Source

National Cancer Institute. *13-Hydroxyoctadecadienoic Acid*. NCI Thesaurus. Code C131741.

A monohydroxy fatty acid resulting from the oxidation of linoleic acid or 13-hydroperoxy-9,11-octadecadienoic acid (13-HpODE). 13-HODE may mediate physiological and pathological responses and is a potential biomarker of various human diseases, and could contribute to the progression of certain diseases.
