

Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Lekha Kannappan

Potential competing interests: No potential competing interests to declare.

1. Introduction part can be precise.
2. Recent citations on the directional UWB antenna can be added.
3. Abstract can be quantitative, and details on the radiation pattern can be included.
4. The paper is well organized and written.
5. Evolution of the antenna and its design methodology can be explained.
6. It is important to highlight the novelty of the antenna as significant points.
