Potential competing interests: No potential competing interests to declare.

1. The abstract should be rewritten to include specific quantitative results obtained from the research.
2. More literature review needs to be incorporated into manuscript with critical reviews of other methods with the advantageous and limitations with proper references and citations.
3. try to Include a recent MPPT algorithm for improving solar system efficacy.
4. mention clearly, the novelty of the presented work in the manuscript, as the same work has been published several times.
5. check the caption of fig 2 , it does not match with the parameters of the curve.
6. use Grammarly for sentence corrections and punctuations.
7. Research motivation and gap is missing in manuscript.
8. i suggest for a critical revision of the manuscript.
