Potential competing interests: No potential competing interests to declare.

Abstract: Nitrogen is the integral part of plants' metabolism. Its deficiency and excess both have serious impact on purpose and economic yield of corn. In abstract aims and significance of study is missing.

Introduction

Following are the key points to keep in mind and revised chapter number

1. Define the problem, first and why author need to do this review.
- 2 What are current methodologies and ways are using to solved the current issue
- 3 Highlight the research gap and explain its importance of doing review.
- 4 Define the purpose method and why it is important and novel to solve the problem in better way as compared to previous one
5. There is need to give at least two to three schematic figure which shows the problem and its impacts on crops, previous methods and author new and novel method.

Conclusion

good
