The topic of the work is attractive and self-explanatory. However, following lack in the manuscript should be improved.

1. There are too large sentences in the abstract. No systematic flow of ideas. Rewrite Abstract with more attractive and meaningful sentences.
2. It will be more helpful for readers , if comprehensive literature would be added in tabular form or any other unique and easier way.
3. Detailed background is provided in literature, which distracts the flow of manuscripts from the main objective of the study.
4. It will be more understandable, if the data would be presented pictorially.
5. Conclusion need to be revised.
6. More relevant and the number of references should be added to make the study more authentic and qualitative.
