Dear sir

The topic of the paper seems to be interesting and useful in practical. The paper is okay in general ,except some points must be fixed before proceed to publishing .

1. The introduction must be edited to conclude a review of previous works for the recent five years. Also, the objective must be mentioned in separate paragraph
2. The solution of the partial equation must be detailed.
3. All the references are old. The references should be updated.

After theses point are fixed it can be published

Best regards
