Digital Literacy in People with Disabilities: An Overview and Narrative Review

Dear Prof. Vankatesan,

The objectives of the study are clearly stated and answered, and it provides support for PWDs' needs and preferences.

As a bibliometric paper, I believe the method of peer-reviewed research on DL in PWDs from prominent databases (from Internet search engines) was appropriate and acceptable for the analysis.

The revised manuscript has a clear and coherent structure, with well-articulated arguments and a comprehensive overview of the relevant literature. I believe your study significantly contributes to the understanding of digital literacies in PWD and will be of great interest to researchers and practitioners in this field.

Therefore, I am delighted to see your manuscript published in the future.

Congratulations on your excellent work.

Sincerely,

Azuraidah Taib
