

Review of: "Research on the uncertainty of low-carbon environmental governance system and its impact on the dual goals of carbon emission reduction"

Yuanyuan Yuanyuan

Potential competing interests: No potential competing interests to declare.

I think this manuscript study is very meaningful. However, it still has the following problems:

1. Some editing for English language is required throughout the manuscript
- 2.The point description of research contribution is not very clear;
- 3.Manuscript is too long, which makes it difficult to read. You should clearly state limitations of your study.
4. It is suggested to add a discussion section and research outlook.
