Dear Editors,

Comments on a manuscript entitled " Solving Pallet loading Problem with Real-World Constraints" for this journal.

There are several concerns with this manuscript. To improve the reported research, it is better to consider the following comments:

1. In abstract, the conclusion is not sufficient and needs some more details.
2. Use the same pattern to write the article. The author should pay attention to the main format of the journal.
3. Author(s) need to use new References in their article and The reference list needs to be updated
4. However, the author(s) need to use the same pattern to write the references.
5. The quality of the figure is poor. Correct their quality.
6. The statistical tests used in this research should be fully introduced.
7. The final conclusion still needs correction. The most important details of the study should be mentioned. The results are not clear. Discussion and conclusions need to be further explained and in the results section, compare the methods.
8. In addition, Authors need to write about the limitations of their article.

Final decision: Major revision.

Kindest Regards
