Immunomodulatory Agent CC-11006

National Cancer Institute

Source

National Cancer Institute. *Immunomodulatory Agent CC-11006*. NCI Thesaurus. Code C101370.

A proprietary, orally available, small molecule and thalidomide analog, with potential immunomodulating and antineoplastic activity. CC-11006 appears to have a similar mechanism to thalidomide and may modulate the expression of proinflammatory and regulatory cytokines.
