## Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. [Micro syndrome](#). ORPHA:2510

Micro syndrome is an autosomal recessive disorder characterised by ocular and neurodevelopmental defects and by microgenitalia. It presents with severe intellectual disability, microcephaly, congenital cataract, microcornea, microphthalmia, agenesis/hypoplasia of the corpus callosum, and hypogenitalism.
