The title of the manuscript is appropriate and indicative of the material, which is contained in the manuscript. The abstract is formulated upon all the criteria of the journal and describes clearly the purpose, materials, methods, results and the conclusions.

The introduction is clearly formulated, complete and very detailed. There is a clear statement of the objectives of the study. Material and Methods used in the study scientifically valid and technically are correct. The procedures are clearly presented. There is no plagiarism in the article. The statistical analysis is complete, the author describes in a correct way the found result. The results and data gathered in the study are presented in a clear and logical method. The discussion is concisely stated. It develops arguments and theories from evidence. The conclusion is clear, concisely presented and based on the results of the study and on the statistical analysis. In my opinion the article should be accepted.
