Thank you for providing the opportunity to review the paper titled "Adoption of Technology Acceptance and Interfaces for Academic Information System Applications". Here are some suggestions for improving the quality of the paper:

1. The abstract lacks depth; the author should thoroughly address the problem.
2. Could the author elaborate on the novelty and research gap explored in this work? How might these findings impact society?
3. Could the author provide more context regarding the scientific background?
4. The introduction requires significant improvement to adequately address the gap, problem, and novelty.
5. The conclusion fails to sufficiently highlight the theoretical and practical contributions of the research or its limitations. Acknowledging the study's limitations could pave the way for enhancing future research quality.
6. Additionally, how were these results validated? What methodology was employed in selecting respondents and collecting data?
7. The author should devote serious attention to refining the paper; there is an excess of inappropriate content for a scientific article. Failure to address these issues may hinder the paper's adherence to essential scientific writing standards. Therefore, a thorough revision is necessary.
