Potential competing interests: No potential competing interests to declare.

- 1. The paper is eye-catching, but I haven't seen the comparison with the state of the art.
- 2. There are many possible values of K. What is the value of K in the KNN model, and why use this value?
- 3. The last paragraph in the abstract needs modification.
- 4. References should be updated, and latest papers should be added.
