Antibody-drug Conjugate ABBV-838

National Cancer Institute

Source

National Cancer Institute. *Antibody-drug Conjugate ABBV-838*. NCI Thesaurus. Code C122816.

An antibody-drug conjugate (ADC) composed of an as of yet publicly unknown antibody and conjugated to an unknown cytotoxic agent, with potential antineoplastic activity. Upon administration, ADC ABBV-838 binds with its antibody moiety to an as yet not publicly known antigen expressed on tumor cells. Upon binding and internalization, the cytotoxic agent kills the tumor cell.
