Potential competing interests: No potential competing interests to declare.

I have made some observations. The suggestions are as follows so far:

1. Methodology needs to be cleared.
2. Need to format and organize the table (1,2,3 and source placement)
3. caption is need to be placed at the top of the figure (1& 2)
4. managerial and theoretical implications is missing.
5. Split recommendation into managerial implication and add theoretical implication as well.
