The authors of the manuscript: Dao Phu-Yen, Pham V.L, Long Ngo.

"Greeting to All"

Article title:

Ancient Houses in Ben Tre City: A Multifaceted Approach to Preserve Artistic Architectural Heritage and Boost Local Tourism

The quantitative and qualitative evaluation status of your submitted manuscript will be announced as follows:

A- The goal (handmade culture and civilization in Ben Tre) manuscript is extremely important because of the presentation of handmade culture and civilization.

B- The title of the manuscript is acceptable.

C- The abstract is a little weak. Authors should reflect the objectives and type of study method, results-discussion, and conclusion more strongly for the audience.

D- The keywords are good and acceptable.

1- The introduction and sub-sets are a bit weak. Authors should not recount the components and scientific literature involved with the culture and civilization of the target community (Ancient Houses in Ben Tre City).

1. In other words, introduction and subsets should be properly managed.
2. Also, in this section, citations and scientific referencing should be done correctly.

1-3- Finally, in the introduction and subsections section, this manuscript is more like a technical report of the target community. It is better for the authors to pay attention to the statistical data and materials and methods of the target population.

2- The results and discussion are brief. The authors should pay special attention to the existing components (Ben Tre) in

this section.

3- The conclusion made is somewhat appropriate. But the authors should make conclusions and suggestions after the necessary changes.

4- The sources used in the manuscript are not properly managed.

“Best regards”

Seyyed Akbar Sadaty, PhD, the first strategic multidisciplinary researcher with the (SMM) process in agricultural water and soil in the world, Islamic Azad University - IRAN.
