

Review of: "[Case Report] Prednisolone Induced Gingival Enlargement: A Rare Case Report"

Sahar Youssef

Potential competing interests: No potential competing interests to declare.

The manuscript needs a few modifications.

1. Careful history of patient in detail.
2. Figure legends for each figure using arrows and abbreviations. To write figure legends, you should label the crown and gingival overgrowth, label any calculus, or disarrangement of the patient's teeth, gum redness, or thickening.
3. Add figure numbers in the text and a brief description.
4. In the discussion section, write the differential diagnosis for this case.

All the best,

Sahar Youssef
