

Review of: "Toward the Realization of Nanogate Capacitors: In Search of Practical Advice"

Seyed-Sajad Ahmadpour¹

¹ Kadir Has University

Potential competing interests: No potential competing interests to declare.

How does the proposed system differ from existing energy storage technologies, and what advantages does it offer in terms of performance, safety, and scalability?

Are there specific industries or sectors where the proposed energy autarkeia system is expected to have the most impact, and how does it align with current trends in energy storage solutions?

What are the key technical challenges or considerations in realizing nanogate capacitors, and how close are we to achieving this technology based on the work of M. Okamura?

What are the potential implications of the proposed system for the broader field of energy storage, and how might it influence the development of future energy storage technologies?
