Review of: "Incidence and Predictors of Ocular Hypertension After Intravitreal Injection of Bevacizumab Among Patients Attending KCMC Hospital, 2023–2024"

S.masoud Mirghorbani¹

1. Farabi Eye Hospital, Tehran, Iran

The idea is not novel or new. However, the methods, results, and discussion are appropriate.

Methods are well described. Results are sufficient and informative. The discussion reviews the literature appropriately with an evaluation of differences.

Tables are not in an appropriate design. For example, the indications variable should be presented better.

Use appropriate formats to present your data most effectively. Merge tables 3 and 4.

If the editor likes the topic, the format of the paper is well written.
