Potential competing interests: No potential competing interests to declare.

The manuscript presents a thorough and comprehensive review of the pharmacological activities of *Pterocarpus marsupium* Roxb, encompassing a wide array of aspects, including antidiabetic, antioxidant, antibacterial, antimicrobial, anticancer, anti-inflammatory, memory-enhancing, hepatoprotective, anthelmintic, and antihyperlipidemic activities. The inclusion of diverse studies adds credibility to the information, with varying solvents, extraction methods, and concentrations contributing to a holistic understanding. The manuscript is well-structured, employing clear scientific terminology and detailing each pharmacological activity under separate headings. Additionally, it goes beyond surface-level reporting, providing in-depth information on concentrations used, comparisons with standards, and mechanisms of action.
