

Review of: "[Case Report] Acquiring Walking with Lower Leg Prosthesis by Passive Shoulder Blades and Improved Trunk Range of Motion: A Case Report"

Antoanela Oltean¹

¹ University of Constanta

Potential competing interests: No potential competing interests to declare.

The recovery program is very vaguely described.

We recommend specifying the dosage of the exercises, the time allocated for each training, how many times per day, per week and so on.

No data is presented on any test conducted to build up the progress of the subject.

We recommend redoing the "case report" chapter with the rigorous specifications of an experimental research worthy of a scientific publication.
