

Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Kinol A. Mary Joy

Potential competing interests: No potential competing interests to declare.

Authors have presented 'Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging'.

Based on the review, the following comments need to be addressed to make the article acceptable:

1. The paper is well organized and written.
2. The Introduction part is too lengthy. Try to reduce it.
3. There are many typographical errors, and the English in terms of punctuation. There are a lot of grammar mistakes, and the texture presentation is not improved.
4. Figures are not formulated properly.
5. Equation numbering is missing and needs to be mentioned.
6. Authors should improve the figure quality.
