

Review of: "Substance use disorder and associated factors at an opioid de-addiction clinic in Western Kenya"

Manisha Nagpal

Potential competing interests: No potential competing interests to declare.

- Aim and Objectives of the study may be written separately
- key words may be limited to 3-5 without repetition. Author may kindly use the MeSH terminology for this
- Background- reference no. may not be repeated after each sentence. More recent references and data may be added
- Methods-How references in material and methods have been added specially reference no. 16
- Results- Author may kindly check the repetitions in tables description. Author may have used some statistical analysis to support his results in Table no.3. Also please clarify the no. of study subjects in the same table. Tables 4 and 5 seem repetitions, also statistical analysis may be done and kindly check the calculations. What tool of data collection has been used in table 6. Author may kindly clarify that how many subjects were taken and what technique used to arrive at the inferences.
- Discussion- seems to be quite lengthy. Author may kindly make it more specific with evidences from recent studies.
- Conclusions- May be more crisp with answer to what are the aim and objectives of the study
- References- Author may kindly refer to the journal guidelines or Vancouver style for citing references.
- Ethical approval part is repeated.
